

## REYNELLA BRIDGE – ADELAIDE – AUSTRALIA

Refurbishment of the Reynella Bridge in South Australia (South of Adelaide) by means of a **ZINGA** duplex system in June 2008.

### System:

ZINGA: 1 x 60  $\mu$ m DFT  
 Monoprimer: 1 x 80  $\mu$ m DFT  
 Alufer WR: 1 x 80  $\mu$ m DFT

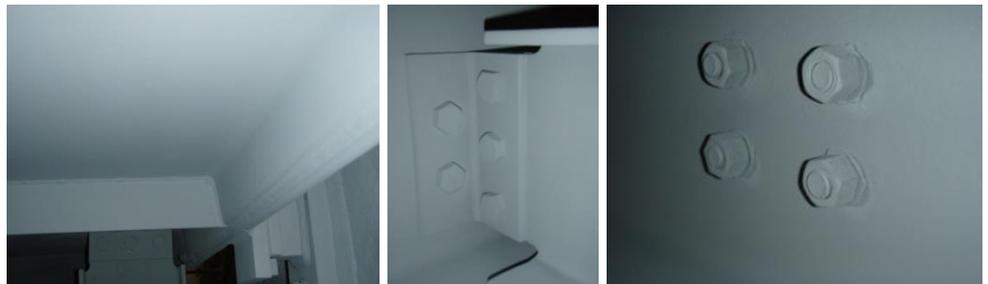

Airless application:  
 GRACO Xtreme X60

These pictures clearly indicate the high degree of corrosion before refurbishment with the **ZINGA** system.

**ZINGA** was applied as a primer.

Followed by a coat of **Monoprimer** and **Alufer WR**.
